MEMORANDUM

To: Jennifer Murphy, P. Eng.
Enbridge Gas Distribution Inc.

Peter Mussio
Union Gas Ltd.

From: Eric Loi
Senior Engineer, Industrial Specialist

RE: 2018 Mid-Year Natural Gas Composition and High Heat Value Data

Thank you for your letter (enclosed) dated August 8, 2018 on the natural gas composition and high heat value (HHV) data for the mid-year 2018.

Regulation 390/18 (Greenhouse Gas Emissions, Quantification, Reporting and Verification) and the *Guideline for Quantification, Reporting and Verification of Greenhouse Gas Emissions* (Guideline) allow for the use of fuel high heat values in the calculation of greenhouse gas emission from general stationary combustion sources.

The provisions in the Guideline include the use of fuel sampling or results received from the fuel supplier at the minimum frequency of semiannually for natural gas. The high heat value data that is contained in your August 8, 2018 letter for your respective companies does meet the minimum semiannual frequency requirements for fuel sampling and subject to the facility meeting all the other applicable requirements in the Guideline pertaining to the measurement of natural gas, the data can be used for the calculation of greenhouse gas emissions in applicable equations.

Thanks for your cooperation in providing this data for facilities to use in the calculation of mid-year 2018 emission.

Yours truly,

Eric Loi, P.Eng., M.Eng.

Cc. Loraine Chan, Senior Program Advisor, Cap and Trade Program Branch, MECP

Dear Eric:

RE: 2018 Mid-year Gas Composition and HHV Data

Union Gas Ltd. and Enbridge Gas Distribution Inc. are pleased to provide gas composition and higher heating value (HHV) information for the reporters who will be completing a mid-year 2018 emissions report for the Ontario GHG reporting system. This is provided in the summary tables below for both Enbridge and Union franchise areas. We understand that that this information will be made available to facilities by the Ministry for use in calculations under Regulation 390/18 and information purposes.

Sincerely,

Jennifer Murphy, P. Eng.
